This Document is as Fluid as the Situation

Everything about the disease, it's spread, governmental guidelines, social responses, the needs of our families, and the financial environment have been in constant flux. Our plan and procedures for how we address all of these things must be adaptable, purposeful, based in science, according to the regulations put forth by state and federal governments, and effective. In order to be all of those things we cannot be afraid to constantly evaluate our policies and procedures, seek out new & sound information, and adjust our responses accordingly. AAG will alter any and all of this handbook as needed to fulfill these goals.
